

♣ Folding a Flag

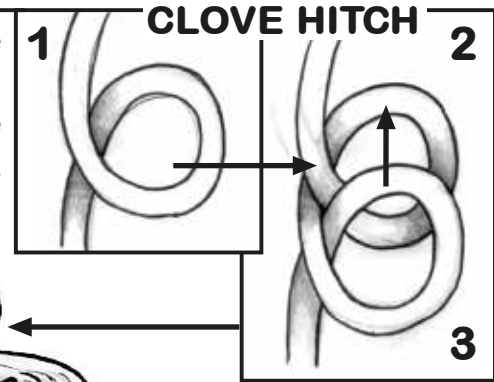

A flag needs to be folded in a certain way before it is hoisted.

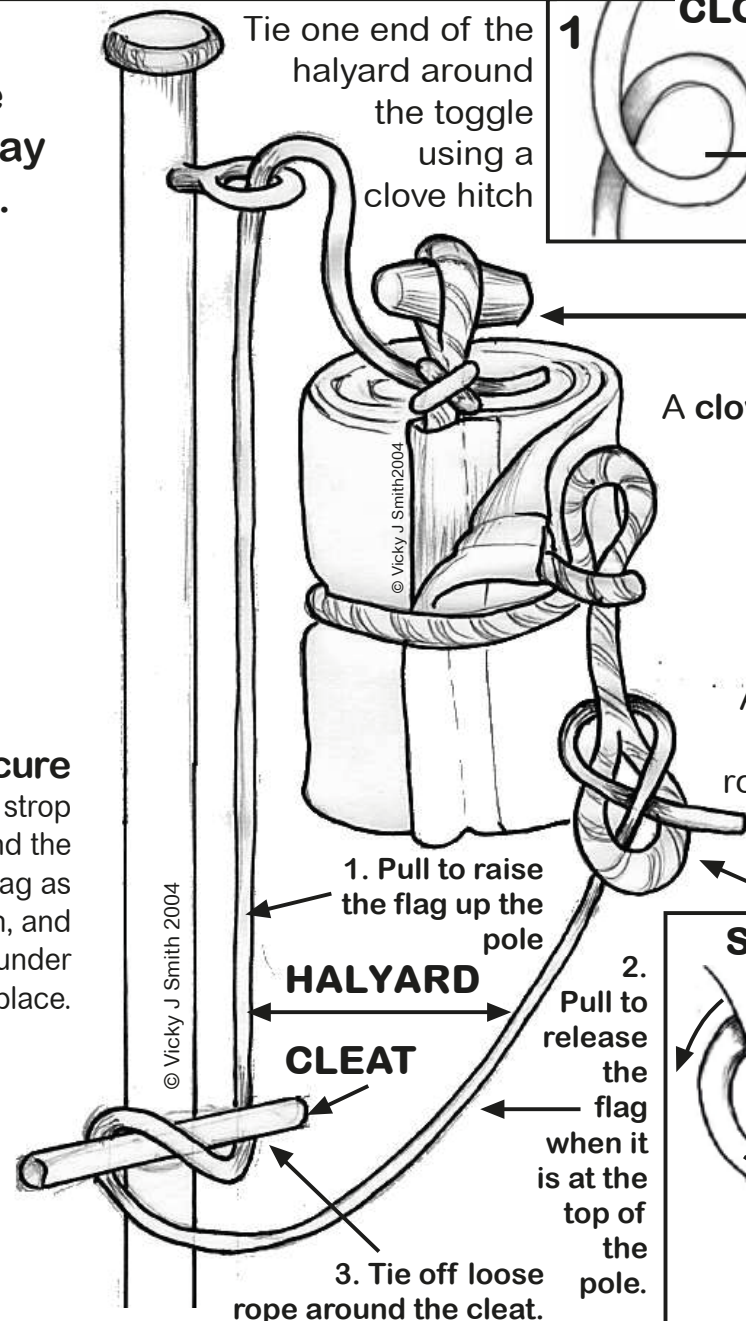

For a very small flag miss out step 2.

Secure
Wrap the strop around the rolled flag as shown, and tuck under to hold in place.

A clove hitch will not slip when the rope is pulled tight, but it is easy to untie when the rope is loose. A sheet bend is used to join two ropes of unequal thickness.

♣ Hoisting a Flag
